- Implemented innovative code and design to complete complicated tasks both user controlled and autonomous

The University of Texas At San Antonio

San Antonio, TX • Expected in 09/2020

- During my time at the UTSA coding bootcamp I learned HTML, CSS, JavaScript, Node.js, API's, and even servers and databases!

- We learned the languages using visual studios code, MySQL workbench, and node.js.
- During our time we used GitHub to generate repositories for our homework and projects for class, and to collaborate with fellow class members to create applications for the three projects required by the school.
- We learned to use JavaScript to access already existing API's, and even to generate our own API's.
